Notes - 7/20/59 - "Number mowing all pens."

For comparison, of mean results we can get
in Worden House, note of housing 318 4W 4/3/58,
having weight 320 but getten 332 on 1/14/58.

~~4E pen hooked 1/59 housed 5/2/59, put egg 5/8/59,~~
~~go progressively more lame 5/24/59 they let~~
~~it walk around under lean enough to break the~~
~~tooth bruise. Hatched heavy.~~ See below ~~Left lady~~ Leave Pen smaller
~~during this date not left the heavy galvanized~~
~~iron of the floor to the of Pen study 8D. ft Beacon~~
~~Rock. Pen showed an medium in jump 7 on~~
~~H6/59 they were still thirsty.~~

For comparison, note of 2/15/59 "weed pen worn
Pen day 75% by 10:45 a.m. Old hens keeping
from 55% to 70% daily.
Note re pens from Federal Reserve (5/25), more weed pens
keeps.
For comparison - note pen weeds of the hens in
Dec. end of keeping year: July 70%, August 63%
Sept. 6%, Oct 56%, and even in Nov. 44% for the
last ... still here. They were added to Pen pens
